Reasons for Allowance

Allowable Subject Matter

Claims 1-28 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record lacks in disclosing a cut-out portion in a connection portion between parts of the light-proof member in order to form a through-hole for a signal terminal of the optical sensor. The prior art also lacks in disclosing a second light-proof member to prevent the incidence of the external light from a gap between the board and a slit provided in the light-proof member for the insertion of the board. Furthermore as pointed out in Applicant's arguments, the closest prior art of record, Fujimoto, does not disclose a light-proof member that is provided in the indicator body and covers the lens and the optical sensor completely in such a manner that external light other than light from the light-incident aperture is not incident on the lens and the optical sensor. Fujimoto provides a filter that allows infrared light through it. Therefore, the filter is not a light-proof member that completely covers the lens and optical sensor so that external light is not incident on these elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Amendment

It has been noted that claims 24-28 have been amended.
